A significant amount of the mentioned weapons and arms were being held by elements within the PA in direct violation of all agreements with Israel and directly prove the undeniable connection between official elements within the PA and the terrorist activities against Israel.

In addition, a large cache of counterfeit NIS 100 and NIS 200 bills were found adding up to a sizable sum. The counterfeit bills were found together with the plates and material needed to create millions of dollars worth of counterfeit Israeli bills and coins.

Among those detained during the operation were 10 individuals wanted for their involvement in terror activities against Israel. They are now being questioned by the Israel Security Agency (ISA). Additional individuals are currently undergoing identification and questioning due to the lack of documentation on their person. We believe that there are additional wanted terrorists among those detained, hiding under borrowed identities to avoid arrest. Upon definitive identification, these wanted terrorists will also be questioned by the ISA.

At this point in the operation IDF forces are acting to flush out and catch other wanted terrorists in hiding.
